

Mono-Dicalcium Phosphate (MDCP) Feed Grade

General Information:

Source	Inorganic mineral source only (reacting of wet process defluorinated phosphoric acid + calcium carbonate)
Bioavailability	Typically > 48% water soluble P and > 98% Citric acid P solubility
Color & Appearance	White or slightly off-white powder or microgranule
Screen Analysis	+150 mesh to -20 mesh

<u>Analysis</u>	<u>Guaranteed Analysis</u>	<u>Typical Analysis</u>
Total Phosphorus (P)	21.0% minimum	21.5%
Calcium (Ca)	15.0% minimum	16.5%
Lead (Pb)	0.003% maximum	< 0.002%
Arsenic (As)	0.003% maximum	< 0.002%
Cadmium (Cd)	0.001% maximum	< 0.0005%
Fluorine (F)	0.18% maximum	< 0.16%

Packaging:

Standard – Net 25 kg plastic woven bags with inner liner, totes
