

**L-Threonine - Fufeng**  
Granular – Animal Feed Grade 98.5%

**Physical Properties:**

|                      |                                 |
|----------------------|---------------------------------|
| Molecular Weight:    | 119.12                          |
| Chemical Formula:    | C4H9N03                         |
| Nitrogen (%)         | 11.50                           |
| Color:               | Yellowish0white, crystal powder |
| Bulk Density (kg/L): | 0.5-0.6                         |

**Guaranteed Analysis:**

|                    |                         |
|--------------------|-------------------------|
| L-Threonine (min.) | 98.5%                   |
| Solubility in H2O  | 7.6g/100g water at 20°C |

**Typical Analysis:**

|                         |            |
|-------------------------|------------|
| Loss on drying (%)      | 1.0 max    |
| pH                      | 5.0 – 7.0  |
| Residue on Ignition (%) | ≤0.5 max   |
| Arsenic (As)            | 2ppm max   |
| Iron (Pb)               | 20 ppm max |

**Country of origin:** China

**Packaging:**

Available in 25 kg bags.
