

Zinc Sulfate Monohydrate

Maximo 365 Mini Prill

Description:

The presence of Zinc is critical to the production of growth hormones for the respiration process and for the synthesis of carbohydrates. Zinc Sulfate is used in the production of animal feed for cattle, pork, chicken, turkey, fish, house pets and other farm animals.

Analytical:

Zinc	35.50% Min
Lead	0.002% Max
Iron	1.0% Max
Cadmium	0.001% Max
Chlorine	1.00% Max
Sulfur	17.50% Max

Physical Analysis:

Fineness	+ 16 (1.19mm) 2% Maximum
	- 30 (0.60mm) 15% Maximum

Packaging:

Available in 25kg bags, Super sack 1000+kg
