

Zinc Sulfate Heptahydrate

Description:

The presence of Zinc is critical to the production of growth hormones for the respiration process and for the synthesis of carbohydrates. Zinc Sulfate is used in the production of animal feed for cattle, pork, chicken, turkey, fish, house pets and other farm animals.

Analytical:

Zinc - Zn	21.5% Min
Lead - Pb	0.005% Max
Magnesium - Mg	0.1 % Max
Iron - Fe	0.5% Max
Cadmium - Cd	0.06% Max
Aluminum - Al	0.2% Max
Copper - Cu	0.005% Max
Arsenic – As	0.0002 Max
Mercury – Hg	0.0001 max
Sulfur	10.5% Max

Physical Analysis:

pH (5%)	3.4
Insoluble (%)	0.3 max
Humidity (%)	5 max

Packaging:

Jumbo polypropylene bag with polyethylene liner 25kg polypropylene bag with polyethylene liner.

Capacity of 1,000kg or 1,500kg with lower discharge valve.

Wooden pallet (non-returnable)

Hooded and protect with stretch film.

Storage:

To stock in a ventilated, cool and dry area. Away from direct light from the sun, heat and incompatible materials such as acids and bases.
